### GUEST COLUMN OF THE MONTH

**This Month...“Seasonal Hair” by Nelson Barreto**

## “Seasonal Hair” by Nelson Barreto

During the summer months, what I like to call “seasonal hair” takes on a whole different shape. We at Ene Salon have realized over the years that our clients, like many people, don’t realize that weather changes our hair in a dramatic way. A cut or a style, the texture, all will change with different temperatures, humidity levels, etc.

It is essential to explain this to each of our staff members so that they, in turn, can pass the information on to our clients. They appreciate this and are less stressed out over the condition of their hair. We recommend a different approach to the way we style “seasonal hair”.

The key factors to successful everyday style are the products you choose. The key factors are using products that will prevent dehydration, keep hair humid and cause less fly-aways.

People often ask my advice on which products to use. There are products today that contain daily hydrating properties. “Lanza” products provide hair with hydrolyzed amino acid keratin which allow the benefits of their products to work without requiring heat so as not to damage the hair cuticles. “Lanza” Anti-aging shampoo contains white tea cystine particle complex and the anti-aging conditioner contains manuka oil that will strengthen elasticity and restore youthful shine, and also works with the Neem Serum used in India for many years.

The aging of your hair has nothing to do with the age of the individual. It is important that people know that it is the nature of hair. Aging of hair is increased by numerous factors including pool water, air pollution, and over blow drying, just to mention a few.

My favorite thing to do is to place my clients on a regimen of conditioning treatment before and after service. For example, a Japanese treatment called “Bio-ionic Hydrator” breaks down clusters of water into tiny water molecules. This allows water to penetrate deeper for maximum hydration. This rich formula contains proteins, and essential botanicals.

Don’t stress out over your hair. There is a shampoo, conditioner and serum to condition and restore vibrant quality to all types of hair.

### RAY BARRETTO -- ACID

This disc burns, but judging from the cover & the fact that it came out in the 60’s, I think Barretto was referring to a different type of acid. There’s some great playing here, from the beginnings of the classic Fania salsa sound of the 70’s to the intricate latin jazz arrangements you can see that this is no run of the mill latin disc. “Soul Drummers” & “Espiritu” are standouts. For the musicians out there, I rate this 4 bones, for the casual listener, 3 bones. It’s worth a hit.

“See you next time on the corner....”

**Closing Statement:** “There can be no happiness if the things we believe in are different from the things we do.”
